

- Multi-million pound platform investment
- Based on award-winning Broadsoft technology
- Market-leading VoIP provisioning service

These are some of the **key attributes** to look for when selecting a Hosted IP Telephony partner

We also have a great channel programme with excellent sales and marketing support, as well as an extensive training programme which will enable both voice and data providers to gain the knowledge required to effectively sell Hosted VoIP solutions.

Hosted IP Telephony from HIPCOM is a genuine partner opportunity. Since launch at the beginning of September we already have 10 partners on board, with 1,500 users activated. The HIPCOM offering is unique, as we are the only Broadsoft distributor in the UK. Coupled with our market leading VoIP provisioning platform - and our price of course - this makes us the only choice when it comes to White Label Hosted IP Telephony.

To maintain the quality of the service we provide to our customers, we're only taking on a limited number of selected partners.

Want to be one of them?
