

# Bridge the gap

with VoIP skills training from Hipcom

## The new Hipcom VoIP Skills Training programme

Our tailored partner training programme has been designed specifically to give you the skills you need to sell Voice over IP Technologies, whatever your start-point. With a one day VoIP foundation course for those who need the basics, a three day certified VoIP technicians course, a two-day certified VoIP engineers course and a one-day VoIP administrators course, you'll have all the technical skill you could possibly need. In addition, Hipcom also offer a one day go-to-market sales training course to assist partners in identifying and closing Hosted IP Telephony opportunities.

**The world of VoIP is a fast-paced, rapidly-evolving environment and Hipcom are working hard to ensure that their partners really do have the skills required to maximise the business opportunity which Hosted IP Telephony presents.**
