

## **News International Brochure**

### **The future of newspaper manufacturing**

#### **INVEST**

In 2004 News International launched a highly ambitious £650m project to develop three brand new newspaper manufacturing plants, fully equipped with state-of-the-art printing presses and located in Scotland, the North West and near London.

Although designed to future-proof News International's own manufacturing capabilities, from late 2007 these plants will also be available for contract printing through the Newsprinters group of companies, the new manufacturing division of News International.

News International Limited is the main UK subsidiary of the global media company News Corporation. For further information please visit [www.newscorp.com](http://www.newscorp.com).

#### **MANUFACTURE**

Our mission is to be recognised as the best newspaper manufacturer in the world.

Each of our three plants has a number of MAN Roland Colorman 6-86 presses, with a web width of 2,211mm (4 x 4 triple width), cut-off 578mm, maximum tabloid image area 265mm x 340mm and can handle 42.5gsm, 45gsm, 48.8gsm and 52gsm newsprint. All include stitching capability of up to three separate sections.

#### **Newsprinters (Eurocentral) Limited – near Glasgow (M8/A8)**

One line of two presses, six units per press with two 4:7:7 folders, 144pps full colour tabloid (or broadsheet equivalent) pages straight at 86,000 cph.

#### **Newsprinters (Knowsley) Limited – near Liverpool (J4, M57)**

One line of five presses, five units per press with five 4:7:7 folders, 120pps full colour tabloid (or broadsheet equivalent) pages straight at 86,000 cph.

### **Broxbourne**

Central London	<a href="#">xx minutes</a>
Slough	50 minutes
Cambridge	55minutes
Milton Keynes	60 minutes
Oxford	75 minutes
Ipswich	80 minutes

## **PROTECT**

All members of the Newsprinters group of companies are part of a global environmental initiative to become Carbon Neutral. Our newsprint contains a high percentage of recycled paper, and added virgin fibres are sourced from sustainable managed forests.

Energy efficiency measures have been implemented at all three sites, from lighting to water usage, and we have negotiated with our energy suppliers the provision of electricity from renewable and responsible sources such as hydroelectric power. We follow the recommended guidelines of the UK Printing Solvent Substitution Scheme, using NonVOC cleaning chemicals throughout the business and operate cleaning chemical recovery systems which reduce the amount of chemicals used.
