**You are
about to be
turned on...**

Broadband SDSL. A genuine alternative to expensive leased lines!
AVAILABLE SOON IN YOUR AREA.

Here at Spitfire we have identified that the exchange in your area will become SDSL enabled in the next few weeks. This means that a genuine alternative to expensive leased lines is now available to you.

SDSL is ideal for businesses that need high speed, symmetric access to the Internet or who want to connect sites together via a VPN or corporate network. If you have a requirement for high bandwidth data transfer both up and downstream, for onsite hosting of websites and content, or for Voice over IP – then talk to Spitfire about SDSL. You can benefit from up to a 50% saving on average and even more if your sites are a long way apart.

We will remind you again nearer the date, but in the meantime please call 0800 33 34 35, email sdsl@spitfire.co.uk or visit www.spitfire.co.uk/sdsl, to find out how you can take advantage of SDSL now*, leaving you with more IT budget to spend on all those other things you've been wanting to do!

*Not all premises in SDSL enabled exchange areas will be able to receive SDSL straightaway. Please contact us with your postcode to confirm that you will be able to receive SDSL.

**Could it be
good for you?**

Broadband SDSL. A genuine alternative to expensive leased lines!
AVAILABLE NOW IN YOUR AREA.

We wrote to you recently to let you know that the exchange in your area would become SDSL enabled in the near future - and we're pleased to be able to tell you that this has happened in the last few days. Meaning that a genuine alternative to expensive leased lines is now available to you.

SDSL is ideal for businesses that need high speed, symmetric access to the Internet or who want to connect sites together via a VPN or corporate network. If you have a requirement for high bandwidth data transfer both up and downstream, for onsite hosting of websites and content, or for Voice over IP – then talk to Spitfire about SDSL. You can benefit from up to a 50% saving on average and even more if your sites are a long way apart.

Call 0800 33 34 35, email sdsl@spitfire.co.uk or visit www.spitfire.co.uk/sdsl today to find out how you can take advantage of SDSL now*, leaving you with more IT budget to spend on all those other things you've been wanting to do!

*Not all premises in SDSL enabled exchange areas will be able to receive SDSL straightaway. Please contact us with your postcode to confirm that you will be able to receive SDSL.
